SAMAY NANDANIYA

FULL STACK DEVELOPER | REACT.JS | NEXT.JS | NODE.JS | JAVA MICROSERVICES | ANGULAR

samaynandaniya4@gmail.com | +91 7778973118 | LinkedIn: samay-nandaniya

PROFESSIONAL SUMMARY

Full Stack Developer with **4+ years of professional software development experience** building and enhancing enterprise web applications. Core development experience includes **React.js, Next.js, Node.js and Express.js**, complemented by Angular application development and current contribution to **Java-based microservices** in the telecom domain. Skilled in REST API development, frontend-backend integration, authentication, application performance optimization and automated testing.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, SQL

Frontend: React.js, Next.js, Angular, Redux, HTML5, CSS3, Tailwind CSS

Backend & Architecture: Node.js, Express.js, Java-based Microservices, RESTful APIs

Database & Testing: MySQL, Jest, Mockito, Selenium

Tools & Platforms: Git, GitHub, Bitbucket, Jira, Jenkins, Maven, Keycloak, VS Code

PROFESSIONAL EXPERIENCE

SYSTEM ENGINEER | TATA CONSULTANCY SERVICES (TCS) | June 2022 - Present

- Developed and enhanced enterprise web applications primarily using **React.js and Next.js**, contributing to a 30% improvement in page speed.
- Built and maintained backend functionality using **Node.js and Express.js**, including 25+ RESTful APIs; currently contribute to a telecom solution built on **Java-based microservices architecture**.
- Delivered frontend features and enhancements using **Angular**, complementing broader development experience with React.js and Next.js.
- Integrated telecom APIs for account management, billing and subscription workflows, improving self-service efficiency by 20%.
- Implemented secure authentication and multi-tenant role-based access control (RBAC) using **Keycloak** for applications serving 10K+ users.
- Built automated tests with **Jest**, achieving 85%+ unit-test coverage and contributing to a 25% reduction in production bugs.
- Optimized frontend performance through server-side rendering, lazy loading and effective state management; collaborated with cross-functional teams of 30+ members across 3 Agile Release Trains (ARTs), reviewed 50+ pull requests and contributed to CI/CD improvements that reduced deployment time by 40%.

SOFTWARE ENGINEER INTERN | PYTHER INNOVATION | January 2022 - June 2022

- Implemented 7+ user roles in a user-management application using React.js and Node.js/Express.js.
- Developed 15+ RESTful APIs for authentication, data processing and database operations.
- Designed and optimized MySQL schemas, improving data-storage efficiency and query performance by 20%.
- Implemented server-side validation and error handling, reducing user-related errors by 30%.
- Built an interactive Google Maps-based application using the Google Maps API and integrated Redux across 20+ components.
- Created and executed 30+ Jest unit tests with 90%+ coverage; collaborated in a 5-member Agile Scrum team and used Git/Bitbucket for version control.

CERTIFICATIONS & AWARDS

- AWS Certified Developer - Associate
- AWS Certified Cloud Practitioner
- Proactive and Growth Mindset - TCS (2023)
- On The Spot Award (Eli - 2022)

EDUCATION

Bachelor of Engineering in Computer Engineering | August 2018 - May 2022

Government Engineering College, Bhavnagar | CGPA: 8.8/10
